## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitations of claims 13, 25 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Drake et al. The patent to Drake et al teaches structure as claimed including a slidable module shelf (40) having a front shelf end and a rear shelf end, the shelf including a components region (46) and a rear catch mechanism (82) at the rear shelf end, the rear catch mechanism includes at least one pivot, and a pair of opposing module guides (70) to support and guide the shelf relative thereto, the guides having a front guide end and a rear guide end, each guide including a track to support and guide the shelf thereon, the guides further including a pivot support (fig. 6, bottom wall of 72 underneath slot 76) disposed at the front guide end and configured to engage the pivot of the rear catch mechanism at the rear shelf end of the shelf, whereupon the shelf is pivotable about the pivot, the pivot being supported by the pivot support of the guides, the pivot support includes a front wall and bottom wall adjoining the front wall, the front wall stops the shelf from sliding past the front wall, the shelf including a front stop(the lower front edge of member 30).

***Claim Rejections - 35 USC § 103***

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 13, 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Drake et al. The patent to Drake et al teaches structure substantially as claimed as discussed above including a pivot support. The use of a plurality of like components to provide additional like structures for the same purpose would have been obvious and well within the level of ordinary skill in the art, thereby providing structure as claimed.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Roesler, Weidner, Quade, Dumornay, Kuzstal et al teach structure similar to applicant's.
